

ANNUAL REPORT ABOUT THE SPANISH EDUCATION SYSTEM

Every year, the Council will make and then publish a report about the situation of the Spanish Education System. This report should collect all comprehensive available data, including the possible violence events in the education community (Fortunately, Spain, up to now, don't know situations of extreme violence in the schools).

Moreover, in this annual report, the Council has to inform the measures taken by the Educational Administrations (Autonomous Communities and Ministry of Education) relating to the prevention of the violence and promoting the equality between men and women.

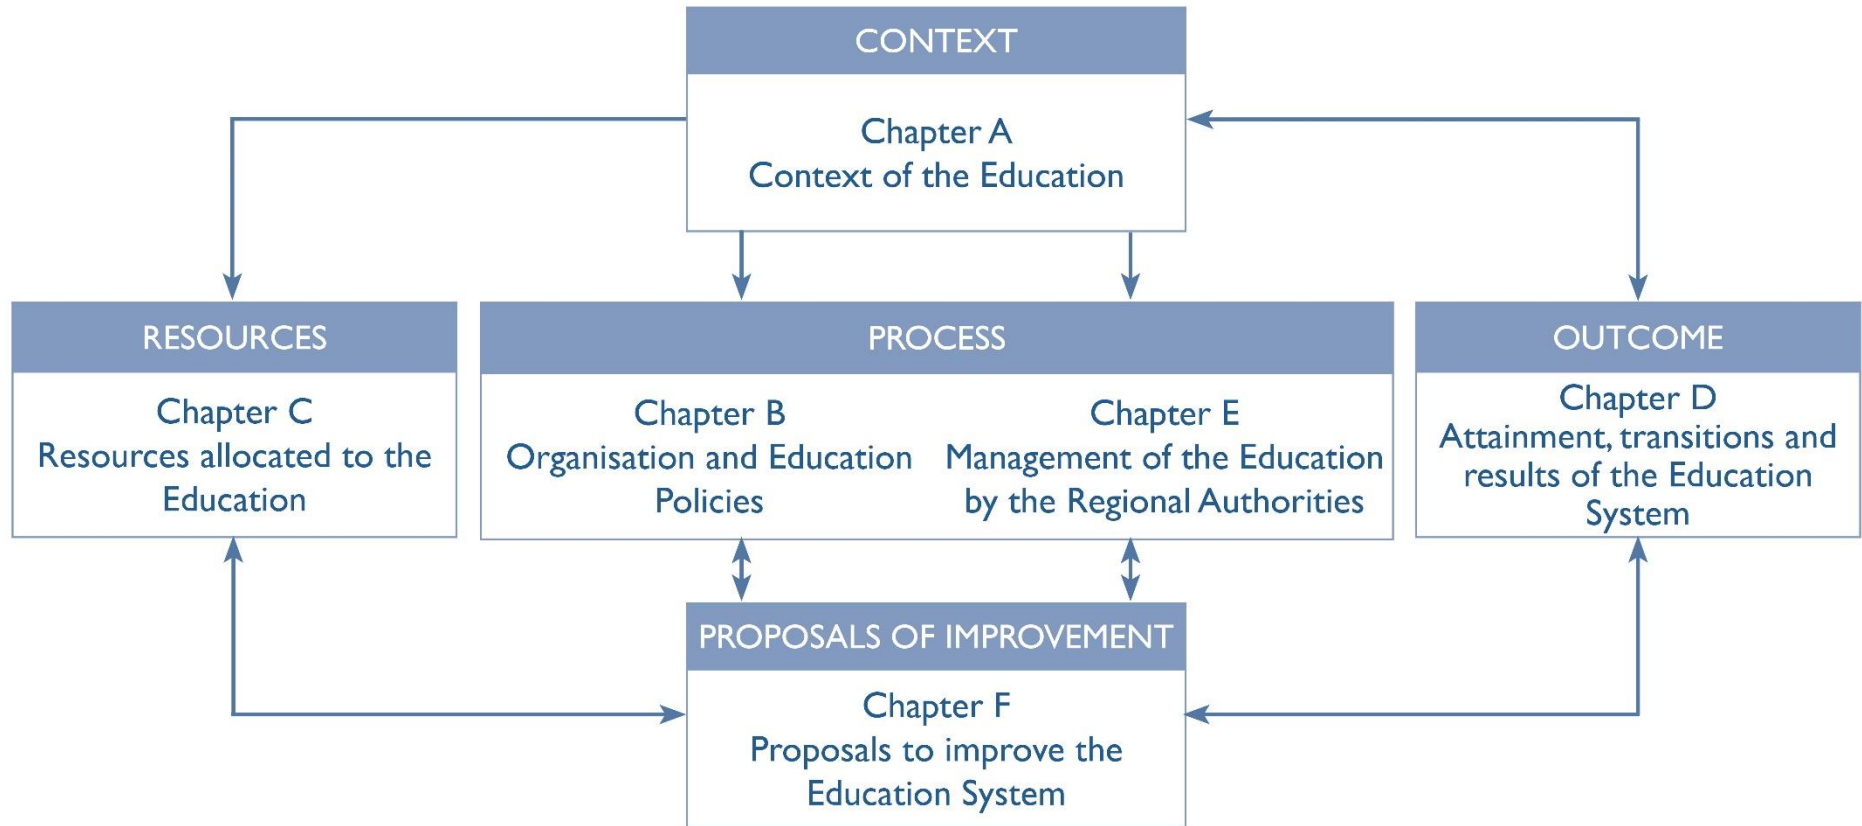

Article 30. Emission of the reports

1. In every topic analysed by the Plenary Assembly of the Council, the preliminary report has to be elaborated by the Permanent Committee.

2. This preliminary report must be distributed to all the 107 Councillors, at least, ten days before the meeting of the Plenary Assembly.

3. The Councillors (usually two) designated by the Permanent Committee will explain to the Plenary the contents of the report and communicate the results of the votes.
