WHO WE ARE?

Institute of Educational Sciences is a national institution for research, development, innovation and training in the fields of education and youth, related unit of the Ministry of Education, Research, Youth and Sports in Romania.

IES is actively developing collaborations and partnerships with public and private institutions concerned with research, education and youth organizations and national and international associations and governmental structures in the field: ministries and government agencies, school inspectors and teachers houses, companies and civil society organizations in the country and abroad. Our main public are coming from a wide range of institutions and organizations: policy makers, schools and universities, teachers, parents, children, youth and adults engaged in lifelong learning.

Our researchers have relevant experience in developing research projects in various areas: as such: curriculum theory, education, preschool education, alternative education, youth and education policy, school management, evaluation, education of children at risk, adult education, vocational continuous counseling and guidance.

To date, the Institute has actively implemented national and international projects in education and youth, has developed curricula and teacher training, conducted pilot projects in innovative areas of learning.

MISSION

The mission of ISE is to promote cutting-edge research in key fields of education sciences and youth studies, providing a sound basis for didactical innovation, school institutional development and informed policy-making in all levels of education and lifelong learning.

Institute of Educational Sciences aims to actively contribute to innovation in education by expertise, training, education and research. Our mission is to provide scientific support necessary to the latest approaches in education, for authentic, motivating, active and creative learning..

The Institute aims at playing a key role in curriculum and teaching resources development and at providing relevant, customized and flexible in-service training for all actors involved in educational system.

The Institute is also promoting networks and communities of practice through national and international cooperation, contributing to the development of an European research area in the field of education.
